Calculation of Grade Point Average (GPA)

- Only grades and credits earned at Regis University are used to calculate the student's grade point average.

Total Grade Points

- Total grade points are calculated by multiplying the number of credits for a course by the grade points associated with the grade received. When no grade points are indicated, the grade and the credits do not calculate into the grade point average.

Grade Point Average

- To calculate your grade point average, divide the total number of grade points earned by the total number of attempted credits.

- Example
  - Biology 3 credits A (4.00 grade points) 12.00 total grade points
  - English 3 credits B- (2.67 grade points) 8.01 total grade points
  - Sociology 3 credits C+ (2.33 grade points) 6.99 total grade points
  - Economics 3 credits B (3.00 grade points) 9.00 total grade points

The number of credits for this grade report is 12. The sum of the total grade points is 36. The grade point is 36 divided by 12, which is 3.000.
