
CN 468 Routing, Switching, and Telecom Challenge Exam – Study Guide

Instructions:

This exam is designed to test your knowledge and understanding of the concepts outlined in the Regis CN 468 course module and your ability to apply these concepts to the real world.

The Challenge Exam also has some tips on how to complete the exam. Remember that you have five days to complete this exam.

1. The exam requires you to design a converged network and to include security issues.
2. Describe in a short paper the design and why you used the components that you included.
3. Include a bibliography of sources in the APA format.

Text:

Maculay, T. (2006). *Securing Converged IP Networks*. New York: Auerbach Publications-Citation.

Understand the following:

- Security
- Converged Networks
