## CN 470 Tiered Infrastructure Challenge Exam – Study Guide

---

### Instructions:

This exam is designed to test your knowledge and understanding of the concepts outlined in the Regis CN 470 course module and your ability to apply these concepts to the real world.

The Challenge Exam also has some tips on how to complete the exam. Remember that you have five days to complete this exam.

1. The exam requires you to design a tiered infrastructure network and to include security issues.
2. Describe in a short paper the design and why you used the components that you included.
3. Include a bibliography of sources in the APA format.

### Text:

Donahue, G. A. (2007). *Network Warrior*. San Francisco: O'Reilly Publishing.

Understand the following:

- Security
- Tiered Infrastructure
