

January 2009

Ronald Sander named Lead Instructor for Computer Networking

I am pleased to announce that Ron Sander has accepted the lead faculty, Computer Networking at SCIS. Ron has taught at Regis University for many years. His computer network classes are very popular with our undergraduate students because of his extensive management and training experience in the telecom industry. He is working with our faculty curriculum development working group to develop the online computer networking and security courses. Ron replaces Kim Herfurt who will continue as an affiliate faculty member focusing on teaching in the new computer networking courses.

Ronald Sander is the Lead Instructor for Computer Networking at Regis University in Denver, Colorado. Prior to accepting this position he was an adjunct instructor at Regis for over 10 years. Overall, he has over 25 years of consulting, management and corporate training experience in telecommunications, at Fortune 100 and 500 companies. His interests are in integrating technology advancements into the Computer Networking Program. He holds a Master of Science graduate degree in Telecommunications.
