

BACHELOR OF SCIENCE IN COMPUTER INFORMATION SYSTEMS DEGREE PROGRAM

This accredited, career-focused degree provides a balance of theory, course work and hands-on experience in business process management, software development and applications, database management, enterprise systems, business analytics, and more. You will learn to analyze how IT initiatives impact your company's short and long-term business goals and how to improve existing business processes and information systems. This bachelor's degree prepares you for a number of exciting careers as a: systems analyst, business process analyst, software engineer, computer programmer, database manager, project manager, and more! This degree program is one of only 35 in the nation accredited by the Computing Commission of ABET, www.abet.org.
