
HOW TO PREPARE FOR THE CS430 Operating Systems CHALLENGE EXAM

MATERIALS:

Students deciding to take the challenge exam should use the current module/text for exam preparation. A college level text will also be very helpful study materials.

EXAM CONTENT:

The content of the exam contains concepts and definitions of organization and operation of computer systems including batch processing, interactive processing, multi-programming systems, storage management, data sharing in main storage, resource control, file systems and processor scheduling. The exam is made up of 10 essay type questions. Each question is worth 10 points each for a total of 100 points. Students will have 2 hours to complete the exam.
