

Information Technology Management

In an era when a streamlined information technology system is critical to the productivity of workplaces and organizations, companies rely on leaders who understand the impact of technology and make the most of technology for improvement of local and global societies.

Develop your technical management skills.

The Master of Science degree in Information Technology Management (ITM) program is designed for leaders, programmers, developers, engineers and other tech professionals who aspire to lead technical teams.

Consult the academic catalog for specific information regarding prerequisites, course sequences and degree completion requirements. Requirements and courses listed above are subject to change.

Not quite ready for the full degree?

Start with a certificate in Agile Technologies and see what you think.

Classes taken as part of the Agile Technologies graduate certificate can be applied toward the Agile Technologies specialization within the master's degree in Information Technology Management, so you can decide to keep going without skipping a beat.

*Indicates classes that can be taken for certificate completion. Admissions requirements for certificate programs may vary. Consult the academic catalog for a complete list of program and application requirements.

The Flexibility You Need

Our program formats are designed to be flexible and convenient, so you can fit your education into your own schedule. On-campus courses are offered in the evenings to fit around your busy work schedule, and online courses are taught asynchronously, so you can log on whenever works for you.
