Information & Cyber Security

With ever-evolving technology, information and cyber security are constant challenges for organizations of all types and sizes. The need for cyber security professionals who can keep up with the latest strategies and techniques in the field is growing rapidly – are you ready?

Keep your company – and your data – safe.

With hacks and cyberattacks on the rise, employers need qualified professionals who can do what it takes to keep their data and technology protected. Data security and integrity are critical, whether in storage, processing or transit. With two specializations to choose from, Regis’ M.S. in Information and Cyber Security prepares you to stay on top of the latest technology risks and protect against the risk of a cyber security threat.

You might be wondering:
