

Accelerated BSN

Do you dream of becoming a nurse but hold a degree in another area? The demand for professional nurses around the country has never been higher, and while many people desire the personal rewards of a health care career, the fact is that earning the necessary credentials can be time consuming. If nursing is your goal, Regis University offers an accelerated nursing program designed to help you realize your objectives and talents in the shortest amount of time.

One year to a nursing career.

The Accelerated nursing program offers students the opportunity to complete the Bachelor of Science in Nursing degree in one year. Any student who holds a bachelor's degree in a field other than nursing is eligible to apply for this program. The focal point of this hands-on nursing program is health promotion and disease prevention. Curriculum includes both classroom instruction and a variety of clinical experiences.

What you'll need:

TO APPLY
