

Psychiatric Mental Health Nurse Practitioner

There is a critical shortage of health care providers that specialize in mental health services. Statistics indicate that there is a great need for professionals that are trained in assessing, diagnosing, planning, intervening and treating clients with mental illness. Be a part of the solution by learning how to provide psychiatric care using psychopharmacological and psychotherapeutic treatments for individuals, families and groups.

Care for the whole person.

At Regis, our mission demands that every individual's human dignity is respected, the whole person is cared for and the most marginalized of our society are served. As a student in the Psychiatric Mental Health Nurse Practitioner program, you'll gain the skills necessary to assess, diagnose, plan, intervene and treat clients with mental illnesses.
