

Cybersecurity Essentials

Cybersecurity is one of the most in-demand skillsets for organizations of all sizes — and those who master its fundamentals quickly become sought-after leaders on the frontlines of data protection. There are currently nearly 715,000 open cybersecurity positions in the United States, with information security analyst roles expected to grow 33% through 2030.

In as little as 8 months, our Graduate Certificate in Cybersecurity Essentials will help you develop foundational cybersecurity skills, qualify for new entry level professional opportunities and help meet the increasing demand for cybersecurity at all levels of business and government.

Keep your company — and your data — safe.

With hacks and cyber attacks on the rise, employers need qualified professionals who have the skills needed to keep their data and technology protected. The Graduate Certificate in Cybersecurity Essentials from Regis University can help you secure a starting position as a security operations center (SOC) analyst or similar position.

National Recognition

Regis University has been designated a National Center of Academic Excellence in Cyber Security by the National Security Agency and the Department of Homeland Security.

Military and Veteran Students

We've been recognized for our dedication to our military students and their families. Here are just a few of our recent accolades:
