

Health Informatics

In addition to the demands of the electronic health record systems, other applications are being deployed that require health professionals who understand both technology and the management of information. An M.S. in Health Informatics from Regis University prepares you to work successfully in an ever-changing health care market.

Combine your health care experience and clinical systems skills for happier, healthier patients.

Health informatics professionals understand technology and its role in promoting the effective organization, management and use of information within the health care environment. This degree will help you bridge the gap between clinicians and IT staff.
