

Computer Information Systems

Computer Information Systems (CIS) professionals enable organizations to make better, data-driven business decisions in an ever-changing technological work environment. At Regis University, focused tracks in either business or health care allow you to make an immediate impact in your industry.

Go beyond the data.

In addition to gaining technical skills, you'll be asked to consider ethics, social issues and privacy within the context of data, using your work to contribute to the social conscience within the IT community.
