

# Information Technology

Information technology is part of nearly everything we do. As technology continues to grow and evolve, organizations and businesses will always need systems-savvy professionals who can protect the networks of tomorrow and administer, update and integrate networks, mobile applications and enterprise systems.

## A degree for the information age.

The B.S. in Information Technology program at Regis University gives you the opportunity to make your mark on issues you really care about. From corporate policy where you work, to IT crime and even national security, you'll be prepared to make an immediate impact within your organization.
