Dr. Jennifer Landrum's research expertise spans workplace health insurance literacy (HIL), adult education, and organizational change. Her doctoral work at Baylor University delved into these areas, investigating the barriers to understanding employer-sponsored health insurance. In her current roles as both a Senior People Systems Analyst and English as a Second Language teacher, Dr. Landrum continually applies her research skills. Whether analyzing data to better inform the organization and improve business strategy, seeking out the newest technological advancements to streamline business processes, or adapting teaching methods to optimize student learning outcomes, she integrates research methodologies into her daily practice, contributing to ongoing advancements in both academia and Business. Dr. Landrum has earned certificates in Artificial Intelligence from the University of Oxford and Business Management Essentials from the London School of Economics. A lifelong learner, she is deeply committed to education as a core value, continuously seeking opportunities to expand her knowledge and expertise. Dr. Landrum's passion for research and education is evident in her dedication to contributing to her field and driving meaningful advancements in knowledge and practice.

Grounded in andragogic principles and Transformational Learning Theory, Dr. Landrum brings over 20 years of teaching experience to her diverse professional endeavors. Her dedication to education transcends traditional boundaries, evident in her multifaceted roles and contributions. She has been asked to author educational, monthly articles for Tulsa People Magazine, serve as the weekly Wellness Educator on FOX's *Great Day Green Country*, and more. Dr. Landrum is TEFL certified and currently designs and instructs curriculum for adult ESL students, providing them with invaluable language skills and cultural integration support. Through this work, she contributes to the empowerment and success of adult learners, hoping to enrich their lives and opportunities in the United States. Dr. Landrum's commitment to fostering inclusive and impactful learning environments extends to her role as a mentor for high school students through the Highview community partnership. Recognizing the importance of building relationships and creating spaces for critical thinking, she empowers students to explore diverse perspectives and navigate challenges effectively. Dr. Landrum places great importance on training employees in utilizing people systems within a company. Leveraging her expertise in HR and technology, she ensures that employees have the necessary skills and knowledge to leverage technology and resources effectively. Through personalized instruction and collaborative learning approaches, Dr. Landrum facilitates meaningful opportunities that support employee growth and contribute to the organization's overall success.

Dr. Jennifer Landrum is deeply committed to being a catalyst for change at the intersection of Human Resources and Information Technology, leveraging her expertise to synthesize information and disseminate insights across diverse platforms. During her tenure as Health and Wellness Director for the YMCA and YWCA Associations of Tulsa, Oklahoma, Dr. Landrum actively fostered community partnerships to advance education

ME

and wellness initiatives for the city. Serving as her company's ambassador for a partnership with Highview in Denver, Colorado, dedicated to empowering high school students with exposure, resources, and career pathways, she leads a team of mentors, personally guiding students toward college success while advocating for their voices to be heard and their potential realized. Beyond conventional boundaries, Dr. Landrum's dedication to driving positive change is palpable. She actively engages in roundtable discussions and collaborative endeavors to enhance educational opportunities and community well-being, leveraging her expertise to enact tangible improvements. Her expertise was further recognized when she was invited to teach a session at the International Foundation of Employee Benefits Plans conference, offering guidance to fellow HR professionals seeking to implement transformative change within their organizations using andragogic principles. She was also featured in the Baylor Alumni Speaker Series in March of 2024. Dr. Landrum's multifaceted approach epitomizes her unwavering dedication to empowerment, advocacy, and the cultivation of meaningful connections across disciplinary boundaries and sectors.

As a leader in both the nonprofit and corporate sectors, Dr. Landrum has consistently demonstrated visionary leadership, strategic acumen, and a proactive approach to driving organizational change. Armed with a Master of Science in Strategic Human Resources Management from the University of Denver, she has honed her expertise in employee wellness, benefits, and human resources information systems (HRIS). Dr. Landrum's human-centric leadership encompasses a wide range of responsibilities, including designing and spearheading training programs, implementing cutting-edge technologies, and leading change management initiatives. In her recent role as a Human Resources Information Systems Data Analyst, Dr. Landrum has served as the driving force behind complex HR software implementations. As the HR leader for projects of such magnitude, she orchestrates cross-departmental efforts and collaborates closely with multiple stakeholders throughout the organization. Dr. Landrum's leadership ensures alignment with strategic objectives, facilitates seamless integration of new technologies, and maximizes the potential of HR analytics to drive organizational success.
