Grant Activity

Completed Grants

Co-Investigator

\$159,871

MyotonPRO assessment of relative muscle contribution during Army Combat Fitness Test deadlift in individuals with and without low back pain.
2021 to 2022, Telemedicine and Advanced Technology Research Center (TATRC). AMEDD
Advanced Medical Technology Initiative.

Co-Investigator

\$229,528

Utilization of portable technology to evaluate muscle stiffness during the ACFT deadlift in individuals with and without low back pain.

2022, Telemedicine & Advanced Technology Research Center (TATRC) AMEDD Advanced Medical Technology Initiative

Co-Investigator

\$192,699

MRI and machine learning to improve early prognosis and clinical management after spinal cord injury.

2019 to 2020, NIH Small Research Grant. Eunice Kennedy Shriver National Institute of Child Health and Human Development

Principal Investigator

\$2,170

The effects of dry needling on muscle stiffness in healthy individuals.

2018 to 2020, University of Regis URSC

Principal Investigator

\$224,000

Preventing biomechanical and neuromuscular consequences after traumatic ankle and foot fractures: an exploratory investigation of manual therapy intervention.

2015 to 2017, Joint Program Committee 5 (JPC-5) Defense Health Program (DHP) Musculoskeletal Injury Prevention Award

Co-Investigator

\$221,668

Using shear wave elastography to assess for physiologic changes after blood flow restriction training in patients with chronic Achilles tendinopathy.

2016 to 2017, Telemedicine & Advanced Technology Research Center (TATRC) AMEDD Advanced Medical Technology Initiative

Grants Submitted – Not Awarded

Co-Investigator

\$240,468

Physical Therapy Management Strategies and Health Promotion for People Following Total Ankle Arthroplasty

NIH - NIAMS

Submitted January 2024

Co-Investigator

\$5,000

Assessment of hex-bar deadlift in Army personnel with low back pain.

2022, Baylor University Research Committee (ONE URC)

Albin SR, (Co -PI), DiLiberto FE, (Co-PI), Moon D, Haddad S. Patient Reported Outcomes and Physical Therapy Management Strategies in Patients Following Total Ankle Arthroplasty with Concomitant Procedures.
