### **New Denver ISSA Chapter Scholarship Program**

The Denver ISSA Chapter is excited to announce the introduction of two \$5,000 scholarships to promote furthering cyber security education amongst the local chapter and the security community in Colorado. We will begin accepting applications for the two scholarships in the fall of 2013 and award the scholarship in December to be used as early as January 2014! The applications will be submitted, handled, and reviewed through the [ISSA Educational Foundation](#).

The two cyber security scholarships are anticipated to increase membership value (including family members of ISSA members) as well as strengthen the information security community. Details about the scholarship requirements will be released within the next few months once they are finalized so stay tuned!”
